### **COMCAST e-Mail BLOCK**

Comcast e-mail users (if you have a @comcast.net address) are having problems receiving e-mail and newsletters from the indianlakepa.us web site. This is not limited to our web site, but any web site using the GoDaddy servers. In response to intense spam attacks and e-mail hijacking in past weeks, all major e-mail providers have had to take similar actions to detect and defend against these attacks.

Comcast's actions were sound and appropriate, they have just taken far longer to lift the

blocks for legitimate sites/traffic, and have not advised customers that e-mail is being blocked for extended periods. The manifestation of this is extensive and goes beyond newsletters; password reminders and registration confirmations sent by private e-mail are also being blocked by Comcast, confusing users who may have problems logging in.

The link below can help get this resolved if you are being blocked
